

George H.W. Bush

The USS George H.W. Bush

At Sans Soucie Art Glass Studios, Inc, we were selected to create a carved glass representation of the presidential seal for the new aircraft carrier, **The USS George H.W. Bush** (CVN 77).

The seal is hand-carved in three dimensions on a 1/2" thick 28" wide x 46" tall piece of Starphire® clear glass.

This impressive design is finished with the signature of 41st president, George H.W. Bush just beneath it and illuminated by LED edge lighting to give it an authoritative presence.

The piece is now on display in the entrance of the Tribute Room, where photographs and biographical information about

George H.W. Bush are arrayed to honor the namesake of the ship.

Named after the nation's 41st president, **The USS George H.W. Bush** (CVN 77) is the 10th and final Nimitz-class aircraft carrier. This revolutionary ship with its numerous improvements and modernizations will pave the way to a new class of carriers. We are honored to be a part of this significant piece of our nation's Naval fleet.
